

COMPREHENSIVE TICKET MANAGEMENT SOFTWARE

Complus Ticket Management solution, **FastTrack™**, records the complete life of a parking ticket. Developed solely for parking management success, **FastTrack™** modules support each step in the ticket lifecycle with a user friendly interface.

DMV INTERFACE

Accurate Registered Owner (RO) information is absolutely key to ensuring that delinquent notices get where they need to go, and Complus delivers the most extensive in- and out-of-state RO information retrieval program in the industry.

AUTOMATED NOTICING

In addition, all noticing functions are executed in-house so Complus retains complete control and accountability over every aspect of the noticing process. Together, these services have resulted in over a 99% successful delinquent notice delivery rate and been a driving force in Complus industry best collection rates!

CONVENIENT ONLINE SERVICES

User friendly and simple to navigate, our online services make it easy for ticket recipients and permit holders to view, pay, and appeal tickets as well as apply/renew parking permits. All actions update the central **FastTrack™** data base in real time so client users have the most current ticket and permitting information possible.

IN-DEPTH REPORTING AND DATA ANALYTICS

Complus reporting features are invaluable monitoring and analysis tools, yielding important data for evaluating parking performance. Reports are compiled in several forms so our clients have access to the most comprehensive information possible at their fingertips.

COMPLUS COMMITMENT

Complus values close working relationships with our clients and focuses on providing long term services. Contact us and learn more about the Complus commitment to providing all the tools necessary for your parking ticket management success!
